

Entering Slovenia - update November 12th 2021

For foreigners who want to enter the Republic of Slovenia, **the recovered/vaccinated/tested rule (RVT rule)** applies. **No quarantine is needed** for the person who meets the RVT criteria.

A person who meets the recovered/vaccinated/tested rule (RVT rule) may enter the Republic of Slovenia without being ordered to quarantine at home. The RVT rule is met **if a person provides one of the certificates** listed below:

1. **a negative PCR test** (no more than 72 hours have passed since the swab was taken), **or a negative rapid antigen test** (no more than 48 hours have passed since the swab was taken) (**NOTE:** it is explicitly stated that the rapid self-test is not considered as proof of entry into Slovenia).
2. **EU Digital COVID Certificate** in digital or paper format and with a QR code (**EU DCC**),
3. **a digital COVID certificate of a third country** in digital or paper format and with a QR code, which must contain the same data as the EU DCC and be issued in English by a competent health authority of the third country (DCC of a third country),
4. **a certificate of COVID-19 vaccination**
5. **a certificate of a positive PCR test result** that is older than 10 days, but not older than 180 days;
6. **proof of recovery from COVID-19 and proof of vaccination against COVID-19** to show that the person has received **one dose of a vaccine** within a period of no more than 180 days since receiving a positive PCR test result or from the onset of symptoms;
7. **Children under the age of 12** are allowed to enter without being ordered to quarantine at home and without applying the vaccinated-tested-recovered rule.

All passengers who enter Slovenia are recommended to fill in a digital passenger locator form (**dPLF form**) <https://app.euplf.eu/#/> prior to entering the country.
